

**VET PRO**

## THE POWERFULL TREATMENT CRUSH

THE UNIVERSAL CARE AND  
TREATMENT SYSTEM FOR CATTLE

The VET PRO is a universal care and operation crush, which was developed together with Prof. Dr. Alexander Starke of the veterinary medicine Faculty of the University of Leipzig. All requests from veterinary surgeons, hoof trimmers and farmers are almost uncompromisingly united at the Vet-Pro.

Both the hoof care and complex investigations as operations can be performed on the **upright or lying animal**, depending on requests and work habits.

Quick and safe fixing of the animal

Tip up to the leg fixing position

Fully washable and disinfectable

Upright

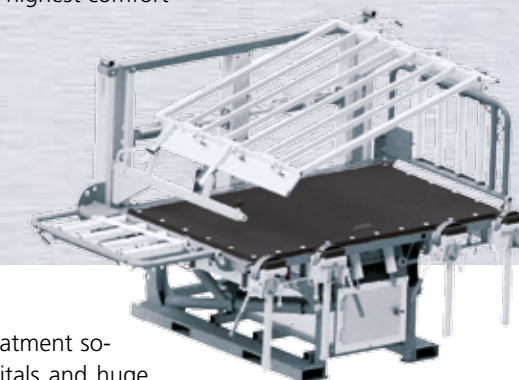

... or lying

## WHAT VETERINARIANS APPRECIATE

- Provides optimal conditions for diagnosis and treatment
- Enables complex examinations and therapies at upright and lying animals
- Animals can be fixed and treated from either side
- Leg holders are adjustable towards any direction
- Modular, individually removable gates facilitate easy access for all kind of treatments
- Safe fixing of the animals whilst optimal access at any time in addition to a maximum of work safety.
- Guarantees maximum work safety whilst optimal access to all body parts of the animal
- Convenient working height
- Quick application (mobile version)

## WHAT HOOF TRIMMERS ARE KEEN ON

- Convenient working height
- Up-to-date leg holders for quick and easy fixing
- Very short distances in the workflow
- Integrated tool box and tool holders
- Safe catching device and practical pushing gate
- Remarkable output and highest comfort

## STATIONARY

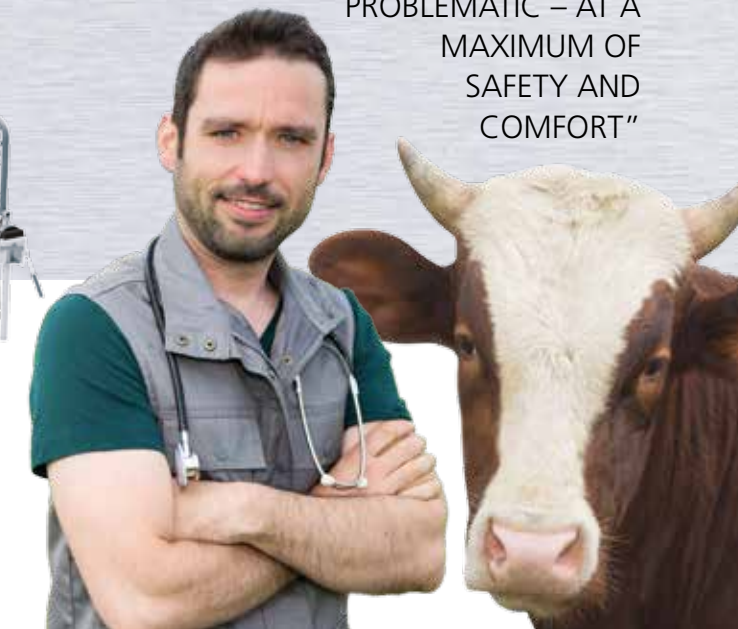

The compact care and treatment solution for veterinary hospitals and huge cattle businesses that rely on rapid medical treatments as well as care services. Especially those companies, who employ an own veterinarian, should not waive this unique solution.

## MOBIL

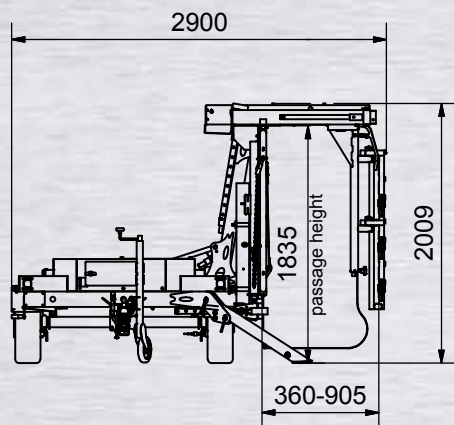

As trailer the usage range of the VET PRO reaches from a unique care and treatment device up to the level of a perfect surgical table. By the mobility and quick application of the unit economic failures can be prevented and often animal lives can even be saved.

„NOW THERE ARE MANY THINGS  
POSSIBLE WHAT PREVIOUSLY WERE  
PROBLEMATIC – AT A  
MAXIMUM OF  
SAFETY AND  
COMFORT“

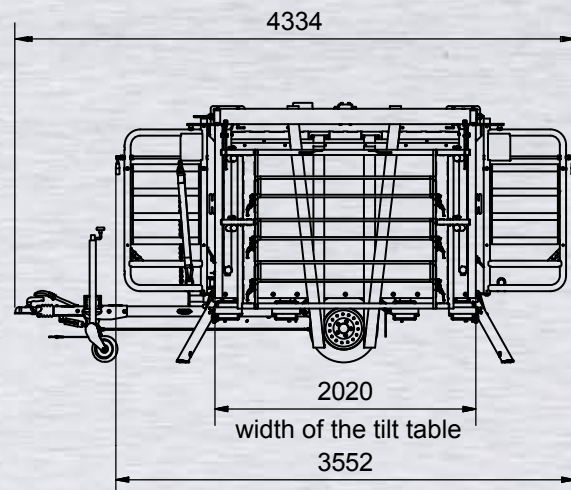

### Standard Equipment:

- Integrated electrohydraulic drivetrain 230 V/2,2 kW
- Completely galvanized basic frame
- Table hydraulically tiltable about 90°
- Massive rubber mat "Cow Comfort" 30 mm
- 5 leg holders, multiply adjustable, extra-long, soft inlays, readjustable
- Lateral guiding gate, shiftable on either side for optimal fixing of the animals, modular and disassembling without any tools
- Head rest/pushing gate on left and right side, modular and disassembling without any tools
- Gentle 2-belt-system, hydraulically tensible
- Wired remote control for all hydraulic functions
- Infusion bag holder
- Central tool holder for two angle-grinders, knives and special tools
- Suspension unit for additional cushions during long treatments
- Lashing straps for the safe transport of guiding gates, etc.

### Additions for the stationary version:

- Transport socket for lifting cart, fork lift and tractor-3-point
- Fixed ground fixation points

### Additions for the mobile version

- TÜV-licensed trailer including lights, suspension, over-run brake etc.
- Manual prop for stability

### Supplementary equipment

- Lifting device for caesarean sections
- Hydraulic prop
- Cushions for shoulder and head rest
- Radio control
- Fold-away drawbar (for mobile version)
